[1] T+n is the date (n) calendar days after trade date (T).
If the settlement date of a T+0 spot deal falls on a non-settlement day for the relevant currencies, the T+0 instrument does not trade on that day.
If the settlement date of a T+1 or T+2 spot deal comes on a non-settlement day for the relevant currencies, the trade is to be settled on the next settlement day.
[4] Only Negotiated Board and deals constituting parts of swap deals are available.
[5] Specialized deals are executed on these instruments, with the exception of Specialized deals on the Basis.
[6] The Execution Basis code (HHH) is determined according to the Clearing Organization's documentation.

The average weighted rate for all instruments is calculated to four decimal places. Negotiated Board and deals constituting parts of deals in dual currency basket instruments with RUB settlement are not included in the calculation.
